

Hi,

I'm a graphic designer and illustrator. For the past three years I've been working with Flo Health and 44Pixels, and before that mostly in media and advertising. I'd say I'm a versatile specialist with a wide range of experience, from illustration and key visuals to vibe coding.

I'm based in Warsaw and currently looking for remote work, as I travel a lot. I'm passionate about my profession and don't limit myself to any one area, always open to new challenges and experiences across different fields of design. Loved your website! Thanks for your time, hope to hear from you!)

Katerina
